

**The best
lawn plow/trencher made
says who?**

Says you!

I am totally impressed with the flexibility and reliability of the Vermeer LM-42. This is a compact machine that has the horsepower, the muscle, the versatility to do the work — and we work it hard, believe me."

Harry Desposito
President, Desposito Trenching, Inc.
Hudson, NY

Professionals like you say the Vermeer® LM-42 is the reliability leader.

Harry Desposito trusts Vermeer to give him the productive edge in plowing and trenching that machines from other manufacturers just don't deliver. Desposito traded his Vermeer LM-35s for the increased power and performance available in the new, upgraded LM-42. "The Vermeer LM-42 will do just about anything you got to do," says Desposito. "We keep both of our '42s hammering hard hour after hour, day after day."

With options and attachments, this versatile, rugged walk-along lawn plow/trencher is like having a diesel-powered toolbox with you on site. Better maneuverability, reliability and more horsepower mean the LM-42 helps you get more work done, in less time, at less cost — for a more profitable day at work!

Ask Harry Desposito: "I've even talked people who are my business competitors into buying the LM-42. I'd be happy to tell you what I told them — just call me at 518-828-5338."

For a limited time, buy or trade for a Vermeer LM-42 and get an extended warranty on LM-42 parts — a full two years!

Call your local Vermeer dealer for more information or 1-888-VERMEER.

Offer ends September 30, 1997.
